

1932 SUPPLEMENTARY PAGES
TO OUR CATALOG "E"

(Please place them in your Catalog for future reference)

We have added new patterns and numbers to our line, as shown in these additional pages, since our Catalog "E" and our two previous supplements were printed, all of which are in production and we are in a position to execute orders promptly on all items shown.

KNIVES FOR SPECIAL USES

NEW *The Schrade Blade with the flat side for more expert work in budding and grafting* **NEW**

These blades are forged from the finest crucible cutlery steel, are given a special temper and instead of having both sides bevelled as is usual, they have one side ground perfectly flat. They possess a remarkably keen cutting edge and the flat side is exactly in line with the direction one naturally takes when cutting and the result is a beautifully flat and undamaged surface to every cut. With the new SCHRADE flat-sided blades you can bud or graft more successfully and obtain more "takes" due to the perfect joint between scion and stock.

No. 1354 $\frac{1}{4}$ W

BUDDING KNIFE, 4 inches long; flat sided blade with bark loosener on back; thick brass lining; cleaned inside; glaze finished blade; White Celluloid handle.

Cuts half size

In order to meet the ever-increasing demand for a smaller knife, we have produced this new SCHRADE SAFETY PUSH BUTTON KNIFE. This knife is small ($2\frac{7}{8}$ inches long), artistic and destined to be a universal favorite. It

is a perfect vest pocket knife and also ideal for the ladies. Made in several styles—two cutting blades, large cutting blade and nail file, with and without bail for attaching to watch chain, handles of celluloid, sterling silver and green gold.
