YOUR ORDER WAS SHIPPED
THE SAME DAY RECEIVED

3/19/77

Dear Mr. Garner,

Thank you for your order enclosed.

The Censor is in Bone - The best way to
tell bone from Delrin is to get a bone + a
delrin + study the differences of the two
for about 2 or 3 hours over a weeks period.
+ you should have it down. I have never seen
a delrin censor.

The ^{new} 6220 peanut is always w
delrin - + you can get one of these to study it. Note
that it doesn't shine like bone.

We have both 6347 & 6347 SSP
in pure - with dots.

Also - we have a 6347 SS Polished
USA for *35 - MWT.

Sincerely,

M.C. Mathew
