

BEAR & SON[®]

CUTLERY

BEAR
EDGE[™]

2020-2021 PRODUCT GUIDE

It all began in 1991 when Ken Griffey and two partners bought the Parker Edwards knife facility, a sister plant to W. R. Case & Sons in Jacksonville, Alabama, to create Bear MGC Cutlery. A lot has happened since then to establish Bear & Son Cutlery as a rising force in the knife industry. After a series of twists and turns, including a time when the firm actually was owned by Swiss Army Brands, Ken Griffey still heads the operation as President. His son Matt, who began working in the factory when he was 18, is Vice-President, as is Ken's wife Sandy, who has played a key role as Vice-President of purchasing and premium department. With their supervisors and management team, they bring a combined knife experience of more than 371 years, including positions with Gerber, Case, Parker Edwards

and Schrade. They head a skilled team of 91 knife craftsmen.

As Americans become more and more concerned about jobs lost to overseas sources, they resent it when they see the words "Made in China" on a product. And they have less confidence in the quality and reliability - especially if it's a knife.

Bear & Son Cutlery meets the test because 100% of their high-quality knives are made in their state-of-the-art Jacksonville, Alabama plant, where they do all their own tooling, pressing, heat-treating, grinding, hafting, finishing and assembly.

"Our fundamental position is clear and absolute: we make high-quality knives, and we make them all right here in the U.S.A.," said Ken Griffey. "And when we say Made in America, we mean everything. We're a family company, and we are dedicated to keeping it exactly that way."

With a wide range of knives - from big Bowies to popular Butterflies - Bear & Son covers almost every knife need.

Their Bear OPS Division, launched in 2011, features a growing line of rugged tactical/survival knives.

While the Bear company began in 1991, for Ken Griffey you could say it actually began in 1976, when he went to work for Parker Cutlery, then a Tennessee knife distributor; or in 1986 when Parker USA started producing Damascus and stainless steel blades in Jacksonville.

Matt says he's been around knives as long as he can remember. From the time he was 4 until he was 10, his mother Sandy engraved blades in their home. And he began working in the factory while still in school.

Clearly, a family business that insists on top quality knives and is dedicated to America.

Knife Anatomy

Highest quality materials and years of experience in knife making combine to make our knives comfortable in hand, a beauty to behold and still tough enough to go the distance.

1. Hollow or taper ground blades
2. Popular blade styles
3. High carbon 440 rust resistant steel blades
4. Hand-matched blade and locking bar
5. All contact points are hand polished to ensure smooth operation
6. Tarnish-resistant nickel silver bolsters
7. Contoured handle for a great feel
8. Dated Dotted System*

* This Dotted System is ideal for the knife collector. It lets the collector know when his pattern was manufactured.

How the Dot System works is:

Look at **BEAR & SON** (Example)

Count the stars on the tang stamp which counts 3, subtract the number of stars away from the year 2030 and it equates to the manufacturing year of your knife. In this example, 2027.

See our new millennium tang stamp for year 2020 to 2029:

Previous Decade Tang Stamps:

1990's

2000's

2010's

Bear MGC
....USA....

Bear & Son

Bear & Son
Jville, AL
....USA....

Bear & Son
Jville, AL
*** USA ***

BEAR MGC
*** USA ***

Bear & Son uses a prefix to the pattern number to designate the handle material.

- 1 Stainless Steel Handles
- *2 Wood®
- 3 Delrin®
- 4 Kryton cushioned grip
- **5 Genuine India Stag Bone™
- 6 Bone (natural or dyed)
- 7 Zytel®
- 8 Mother of Pearl
- 9 Mica Pearl or odd handle materials
- CB Cocobola
- AB Abalone
- **GS Genuine Stag
- WSB White Smooth Bone

* On wood handle knives the end of pattern a letter is placed for (R) Rosewood (HW) Heritage Walnut (CW) Camo wood unless it is part of a series that all the handles are the same type of wood.

** From 1991 to 2006 the number '5' was the Prefix for Genuine Stag Horn. After the Embargo 'GS' was used to show Genuine Stag Horn while the '5' changed to Genuine India Stag Bone™ after 2006.

Steel

Bear & Son products contain only quality USA blade steels (except Sandvik made in Sweden). This is a quick reference to help with what blade steel is right for you.

High Carbon Stainless Steel:

440 Stainless Steel with our own formula.

Facts: Rust Resistant, holds an edge well, diamond or ceramic sharpener recommended due to the metal Hardness.

1095 Carbon Steel:

Steel loved by so many for so many generations.

Facts: Holds a keen edge, very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended.

High Definition 416 Layer Damascus Steel:

A true steel of beauty. Forging 2 types of Carbon steel with a nickel silver layer to make one great looking blade comprised of 416 layers.

Facts: Great edge retention, secret sharpness (Damascus never feels as sharp to the touch), very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended.

Sandvik 14C28N Stainless Steel:

New to the Bear & Son Line. An impressive, high molecular strength steel from Sweden.

Facts: Great edge retention, rust resistant, diamond or ceramic sharpener recommended due to the metal Hardness. (only available in our stainless bowies & letter openers this year).

CPM-154 Stainless Steel

A premium grade stainless steel, that is made in the USA, which offers great corrosion resistance with toughness and a great edge.

The story of a classic

Bear and Son Cutlery is proud to manufacture our 4th Generation Series, made of high-polished 1095 carbon steel blades and popular yellow Delrin®, Heritage Walnut and Red Stag Bone handles. The 4th Generation name comes from the style knife I remember my Papa sitting on the front porch on Saturday afternoon, listening to a Braves game on the radio and peeling an apple. I would try to peel that apple without breaking the peel. My Papa Griffey would always accomplish this seemingly impossible task. I can also remember sitting with my Papa, Dad and Uncle whittlin' a piece of cedar. I can still smell that pile of fine shavings at the end of the day.

These knives have 1095 Carbon Blades, Nickel Silver Bolsters, & round 4th Generation Shields.

C347

We are the only commercial knife manufacturer offering knives with Damascus blades. Damascus steel combines steels of different properties and produces blades with extraordinary toughness and edge-holding ability. Known as the Steel of the Ancients, Damascus knives and swords have lived in legend since the creation of Damascus steel nearly 2,000 years ago. The ancient city of Damascus was one of the centers of production of this steel. That, combined with the fact that the steel resembled the damask cloth which was being produced in the city of Damascus—both having a “water-marked” pattern—gave this steel its name. Viewed under a microscope, the cutting edge of a Damascus blade displays tiny saw-tooth carbides which are formed by forging in a coal fire. This enables the blade to cut even when it feels dull to the touch. Flexibility is superb. Every piece of Damascus is as unique as a thumb print. When ground on an angle, as in a blade, the displayed pattern is stunning. Note: Limited quantities available.

NEW MEMBER OF THE BEAR & SON CUTLERY® FAMILY!

BEAR OPS

Bear & Son Cutlery® is a family owned company started in 1991 with the mission of manufacturing the "Best knives made in the USA" at our fully contained 41,000 sq ft facility in Jacksonville, Alabama. Bear and Son Cutlery is now proudly introducing a new division-Bear OPS®. Because we take our obligation of duty and to our country very seriously; our goal is to manufacture the best Tactical Knives available for those who serve. Bear OPS® knives are made with (OPS) Operational Precision for Superior Tactical Knives that can be relied on for any situation.

- * Only USA manufactured parts, material, and a dedicated workforce.
- * Bear OPS® uses only premium 154CM, CPM-S30V, 14C28N, and 1095 Carbon steel for our blades and use our own heat treat, waterjet, and CNC grinders to finish the blades.
- * Bear OPS® Knives are designed and engineered by the experts in our R&D and our in-house tool makers. You will always be proud to carry a knife from Bear OPS®.
- * Lifetime Limited Warranty on all Bear OPS® Knives.

Bear & Son Cutlery® will continue to manufacture the "Best knives made in the USA" that will now include tactical and military knives made in Alabama USA--Bear OPS®. Buy American Made Products!

Made in America Starts Here!

Sandy, Matt & I have enjoyed working on bringing you these quality handcrafted Bear OPS knives. We have worked with a couple of designers along with Matt, and the R&D department to bring you some exciting patterns. Plus we have bought more equipment to do all the handles in-house. We hope you will enjoy being a part of the Bear & Son Cutlery family. Our knives are American made by Alabama Craftsmen.

WARRANTY:

All Bear OPS® products are guaranteed against defects in workmanship and materials for the life of the original purchaser. This guarantee is voided by misuse, abuse, improper maintenance, or alterations of the product and does not cover any normal wear or tear that might occur. Bear & Son Cutlery® and Bear OPS™ will determine cases of abuse. Using your Bear OPS™ folding knife or fixed blade knife for any purpose other than cutting or puncturing is considered abuse and may void your warranty.

*See warranty card for complete warranty/information.

SHARPENING:

Bear & Son Cutlery® and Bear OPS™ offers a sharpening service for our products at no charge. Please include payment for \$8.00 to cover the cost of return shipment to you. Never sharpen your knife on a power grinder it will destroy the blade and voids all warranties.

STEEL:

CPM-S30V: A premium grade stainless steel created especially for knife blades. It has uniform carbide distribution and clean steel properties. As a blade material it offers excellent resistance AND SUPERIOR EDGE QUALITIES. In keeping with the Bear & Son philosophy CPM-S30V is an American made steel.

1095: Holds a keen edge, easy to sharpen, light coat of oil to prevent rust.

14C28N: Premium steel, corrosion resistant, tough and great edge retention.

154CM: Premium grade steel, that is also American made, which offers great corrosion resistance with toughness and a really good edge.

High Definition Damascus: Is 416 layers of medium and high carbon steel with added nickel to magnify definition. Flexibility is superb and every Damascus blade is as different as a fingerprint. Damascus offers a very good cutting edge.

Ultra-smooth ball bearing action

Durable G10 handle with
stainless-steel hidden liners

BEAR
EDGE™

We are excited to bring you a new knife line!

This line will consist of eight new knives. Bear

Edge™ is the brand and is assembled in the

USA with parts manufactured overseas from

facilities using high tech aircraft aluminum,

G10 and ball bearing action. These are assisted

opening knives with 440 USA stainless steel

blades, heat treated, ground and assembled

in Jacksonville, Alabama. Part of this line is

built in the USA with EDC, Predator, and

Survivor Series knife line with ball bearing

washers and assisted opening. The handles

are aircraft aluminum and Zytel®. Bear Edge™

will also have a 14 SKU line manufactured

in an overseas China factory following our

manufacture guidelines, so you can have an

imported line you will be proud to carry.

Bear & Son Cutlery Purchases GATCO® Sharpeners

"We sharpen your World!"

Bear & Son Cutlery has announced the purchase of GATCO® Sharpeners; including its well-known slogan, "We sharpen your world!" GATCO® which ranks among the top three sharpening companies in the world, will round out the Bear & Son product line and provide a one stop shop for knives and sharpening.

Bear & Son purchased the GATCO® sharpening line with a mindset that these sharpeners are the highest quality product in the manual sharpening industry. GATCO®, produce some of the finest sharpening equipment in the world and carry several different types of sharpeners that are perfect for all Bear & Son knives. "Bear & Son is equipped with a rich family tradition in knife making and the GATCO® brand is a perfect match," states Owner Ken Griffey. "The process for building stock for the new product line is already underway and we are looking forward to offering this new line to our retail partners in an effort to help complete their knife needs," continued Griffey.

No. 6224
GATCO® Super Micro-X™ Sharpener

The ultimate touch-up sharpener for maintaining sharp edges everywhere you need them. Polymer housing holds two medium rods at pre-set angles to ensure ease and accuracy for sharpening, plus two fine sharpening rods for polishing the sharpened edge. Slip-resistant rubber pads provide the user with a secure grip. Sharpens all knives including serrated edges.

Size: 2 5/8" wide x 2 3/4" high (67 mm x 70 mm)

To sharpen, begin with the medium (brown) sharpening rods. Simply place the heel of the knife perpendicular to the work surface. Carefully draw the knife blade along the rod in a "slicing" motion to the tip of the blade. Repeat with the other side of the blade 10-15 times. To polish, turn over the Super Micro-X™ and use the fine ceramic rods (white) in the same way

SHARPENS ALL PLAIN AND SERRATED BLADES

PDQ of 6: 6224P

No. 6402
GATCO® Double Duty™ Sharpener

This unique sharpener combines the best features of our GATSTIX® ceramic sharpener and Edgemate® carbide sharpener. Two precision ground, tungsten carbide blades pre-set at 35°, quickly sharpen the duller blades in four or five light strokes. The two fine ceramic rods at a pre-set angle, put the polished, final edge on your blade.

The carbide and ceramic sharpening elements are set in an ABS Polymer frame with slip-resistant feet and slip-resistant gripping pads.

Size: 2 5/8" wide x 2 3/4" high (67mm x 70mm)

Easy to Use

Top: Draw knife completely through the carbides in one steady motion.

Repeat 4-5 times.

Right: Polish the edge using the two fine ceramic rods with a slicing, sharpening motion.

PDQ of 6: 6402P

No. 40006
GATCO® MCS™/Military Carbide Sharpener

The GATCO® MCS™ Sharpener is the ultimate, lightweight, compact sharpener designed specifically for tactical knives. Precision ground industrial carbide blades, set at a 40° angle, quickly restore a razor sharp edge to all plain edge knives.

This sharpener is designed for the military end user who requires lightning fast resharpener in the field where every second and every ounce is critical in the performance of their equipment.

Size: 2.75" x 1.06" x .30" (69.8 mm x 26.9 mm x 7.6 mm)
Weight: 1.6 ounces (.04732 kgs)

No. 40021 Replacement bits

The ultimate lightweight, compact sharpener designed specifically for tactical knives

Ideal for field use

Industrial carbide blades quickly restore a razor sharp edge

Easy to Use: Simply draw knife completely through the carbides in one steady motion. Repeat 2-3 times.

PDQ of 6: 40006P

No. 6800 GATCO® Pull Through Knife Sharpener

The 6800 uses two precision ground tungsten carbide blades pre-set at 35 degrees to quickly sharpen the duller blades in 3 to 4 strokes. This sharpener is designed to fit easily in your hand with finger notches and rubber coated grips. Not recommend for serrated blades.

Size: 6" wide by 2 5/8" high

Place knife or edged tool on a flat surface with cutting edge up. Using the Apex of the carbide blades, carefully draw sharpener down the full length of the cutting surface. Repeat 2-3 times. Harder steels may require more strokes

Lightning fast re-sharpening of all straight edge knives, meat cleavers, axes, machete's and straight edged cutting tools. Built in hand guard protects hands & fingers for fast safe use.

Bucket of 12: 6800B

No. 40001 GATCO® Carbide Knife Sharpener

Engineered to ensure a fast, safe method to restore a sharp cutting edge to dull blades, the Edgemate® Carbide Knife Sharpener is a must for the kitchen, toolbox, for hunters, fishermen (and women), professionals in the trades and do-it-yourselfers.

Precision crafted from 6061-T6 structural grade aluminum with tungsten carbide sharpening bits set at a 35° angle, this tool ensures lightning fast reshaping and a durable edge. The handle is CNC checked for a secure grip and is hard-coat anodized for rugged good looks and corrosion resistance. The Edgemate® Carbide Knife Sharpener is not recommended for sharpening serrated blades.

Two-piece replacement carbide bit set available: No. 40021

PDQ of 6: 40001P

Scepter® 2.0

No. 50015 GATCO® Scepter® 2.0

Features:

- ✦ 3.3" (76mm) 320 mesh tapered and grooved diamond rod sharpens serrations, hooks and pointed instruments
- ✦ Tungsten carbide sharpener sharpens all plain edged knives
- ✦ 1.75" (45mm) magnesium fire starter rod
- ✦ Lanyard hole for paracord attachment
- ✦ Hard coat anodized

Length: 6.00" (152mm)

Diameter: .570" (14.4mm)

Weight: 2.3 oz. (.07 kgs)

Compact, lightweight and multi-functioning, the new GATCO® Scepter 2.0 is the ultimate survival aid when sharpening and fire starting are necessities. Unique design nests magnesium fire rod inside tapered diamond sharpener and all are inside the CNC machined, solid 6061-T6 aluminum carbide sharpener body.

Each component has precision machined threads and an outer "O" ring.

PDQ of 6: 50015P

**No. 60016
TRI-SEPS® Serration and Knife Sharpener**

This triangular shaped, portable ceramic sharpener has a built-in angle guide to quickly restore a razor sharp edge to serrations, plain edges, entrenching tools, scissors, darts, fish hooks, ice picks, and other pointed instruments. The unique triangular design features two radius sizes and provides sharpening for both large and small serrations.

Made from premium grade 96% alumina ceramic.

Overall Length: 4 1/2"

PDQ of 6: 60016P

**No. 60616
Diamond TRI-SEPS® Serration and Knife Sharpener**

Designed to be the fastest sharpener to re-bevel serrations. Millions of monocrystalline diamonds resharpen serrations faster and more precisely than any other sharpener. The Diamond TRI-SEPS® unique triangular design features two radius sizes and provides sharpening for both large and small serrations. Also features two groove sizes for sharpening fish hooks, darts, ice picks, scribes, awls and other pointed instruments.

Made of monocrystalline diamonds

Overall Length: 4 1/2"

PDQ of 6: 60616P

Diamond Pocket Hones / Diamond Rod Sharpener

Highest quality monocrystalline diamonds • Meet rigid industrial standards

GATCO® DIAMOND HONES – GATCO® engineers select the highest quality monocrystalline diamonds for all our diamond sharpening instruments. GATCO® diamond products meet rigid industrial standards.

Benefits of GATCO® Super Abrasives

DURABLE – Diamond is the hardest material in existence
FAST – Diamonds are the fastest cutting abrasive in the world
EASE OF USE – Simple design and fast cutting crystals sharpen quickly
CLEAN – Can be used dry for increased neatness
VERSATILE - GATCO® diamond technology solves the most difficult industrial, commercial and D-I-Y sharpening, deburring and stock removal challenges.

No. 10003 GATCO® Edgemate™ Knife Sharpening System

This comprehensive knife sharpening system offers chefs, handymen, sportsmen, and woodcarvers everything they need to put a professional, razor-sharp edge on all kitchen, sport, and utility cutlery. The unique knife/clamp guide ensures a precise honing action.

All GATCO® sharpening hones have an integral guide rod holder with easy-out for use, easy-in for storage sliding guide rod. Out premium grade abrasives ensure fast and efficient cutting of all steels, even those with have traditionally been difficult to sharpen.

The system includes:

- ✦ GATCO® exclusive knife clamp/angle guide
- ✦ Coarse sharpening hone
- ✦ Medium sharpening hone
- ✦ Fine sharpening hone
- ✦ Scientifically formulated honing oil
- ✦ Custom carrying case with instructions permanently affixed to the lid.
- ✦ GATCO® sharpening hones with longer, wider stones than competitive models, are ergonomically designed to reduce hand, wrist and arm fatigue. Safety rails protect fingertips.

No. 10005 GATCO® Edgemate™ Professional Knife Sharpening System

The system includes:

- ✦ GATCO® exclusive knife clamp/angle guide
- ✦ Extra-course sharpening hone (Black)
- ✦ Coarse sharpening hone (Yellow)
- ✦ Medium sharpening hone (Green)
- ✦ Fine sharpening hone (Red)
- ✦ Serrated knife sharpening hone (Blue)
- ✦ Scientifically formulated honing oil
- ✦ Custom case

This is the ultimate knife sharpening system that will sharpen all kitchen, sport, and utility cutlery including knives and cutting tools with serrated blades. Never before has a sharpening system done so much! This specialty product utilizes the GATCO® exclusive knife clamp/angle guide to ensure that all cutting tools can be easily sharpened to a precise razor-like edge.

No. 10006 GATCO® Ultimate Diamond Hone Sharpening System

The GATCO® Ultimate Diamond Hone Sharpening System contains:

- ✦ GATCO® exclusive six-angle knife clamp/guide
- ✦ Coarse monocrystalline diamond hone
- ✦ Medium monocrystalline diamond hone
- ✦ Fine monocrystalline diamond hone
- ✦ Special serrated knife sharpening hone
- ✦ 96% alumina ceramic finishing hone
- ✦ Scientifically blended honing oil
- ✦ Custom case with instructions permanently affixed to the lid

The person who demands the highest performance in a sharpening instrument demands diamonds. Diamonds, among the hardest cutting media known, can cut quickly and easily through the hardest steel. These properties provide the discerning customer with a sharpening instrument that will outperform any other type of abrasive media. This system offers the addition of a 96% alumina ceramic hone that provides a surgical finish to blade edges.

No. 12001 GATCO® Easy-Grip™ Clamp Mount

This innovative sharpening accessory holds your GATCO® knife clamp/angle guide to maximize ease of sharpening large knives or many knives in succession. The GATCO® Easy Grip™ Clamp Mount can be permanently attached to any work surface with screws or C-clamped for portability.

Note: Clamp not included.

This year we have completely redesigned the packaging for GATCO sharpeners.

All the packaging will now be brightly colored with blue and gold. The new boxes for the sharpening systems are designed with the customer in mind. They have key features pointed out on the front of the box as well as what features make the GATCO sharpening systems superior to the competitor's versions. We have three different systems to choose from.

The boxes are clearly labeled with which of the three they are as well as an image on the front of the box. Something else very helpful is, we have added instructions to the back of the boxes and the clam packs. These step by step instructions are easy to understand and also are accompanied by photos of the process. To help with which sharpener is best for a person's needs we have added a section letting you know what each one will sharpen. All these changes will make for an easier decision on which sharpener is best for the customer and why GATCO sharpeners are the ones to choose.

GATCO® Sharpening Accessory Hones

Perfect for upgrading your sharpening system or replacing used stones. Can be used with all GATCO® sharpening systems. All accessory hones contain our patent pending adjustable sliding guide rod and finger protection rails.

No. 15010 GATCO® Ultimate Finishing Hone – Provides surgical finish to final cutting edge. Made of 96% alumina ceramic, it is the finest hone ever produced.

No. 15002 GATCO® Extra-Coarse Sharpening Hone – Fastest cutting – sharpens damaged edges and extremely dull blades.

No. 15003 GATCO® Coarse Sharpening Hone – Fast cutting, resharpenes dull knives.

No. 15004 GATCO® Medium Sharpening Hone – Quickly restores dull blades.

No. 15005 GATCO® Fine Sharpening Hone – Produces keen cutting edge

SERRATION HONES

No. 15001 GATCO® Medium Serrated Knife Blade Hone – Restores dull serrated blades to full cutting performance.

DIAMOND HONES

No. 16001 GATCO® Diamond Sharpening Hone/Coarse Grit – Provides fastest resharpening of all knives and damaged blades.

No. 16002 GATCO® Diamond Sharpening Hone/Medium Grit – Maintains keen edge on all knives.

No. 16003 GATCO® Diamond Sharpening Hone/Fine Grit – Provides polished edge in final sharpening

No. 11061 GATCO® Honing Oil – 6 oz. (.170 kgs) **Retail: \$10.99**

No. 11022 GATCO® Honing Oil – 2 oz. (057 kgs) **Retail: \$3.99**

Replacements for Sharpening Systems
Specially formulated FDA-approved honing oil is designed to ensure the maximum suspension of metal fouling and abrasive particles for longer stone life and superior cutting efficiency.

Natural Arkansas Stones

Gatco (R) uses 100% natural Arkansas stone mined from NOVACULITE quarries that are carefully cut to size and skillfully finished to ensure flatness. NOVACULITE, highly regarded by craftsmen worldwide, has a unique crystalline structure which allows it to polish the cutting edge as it sharpens. All GATCO(R) Arkansas sharpening stones come with a custom wood storage case.

Bear & Son Cutlery knives are designed, finished and priced for the hunter, sportsman, tradesman, handyman and knife enthusiast. While other manufacturers are looking for shortcuts to eliminate the labor out of finishing, we finish our knives the same way custom makers do - BY HAND and one at a time! Bear & Son Cutlery offers three free merchandisers and THIRTEEN display panels. The D-36 display features one panel. The D-108 floor display features three panels. Each panel displays 12 patterns. One of each are loaded into the red vac panels and two each are back-up stock. Each display features a lockable front oak frame, and you can easily show or sell products from the panel. The D-108 floor display has a double locking door oak frame, so the unit is front opening for panel or back stock. The D-36 displays have front opening lockable storage compartments in the back. Merchandising is critical for sales success in this category. Pick the size and assortment that best suits your customers and watch your sales GROW!
