By far, the finest Kitchen Aid Set on the market. An ideal gift and a must for every household.

No. 5KF — Same as above, except consisting of Ladle, Fork, Turner, Spoon and Wall Hanger.

How to Sharpen a Knife

1. Start of First Stroke

Grasp sharpening steel firmly in left hand, knife in right. Hold cutting edge of blade away from body and at about a 20 degree angle to the steel. Place hilt of knife at bottom of steel near guard.

2. End of First Stroke

Now, draw blade up and across top of steel with even pressure so that you run blade of knife up to tip of steel. Both knife tip and steel tip should be together at the completion of this stroke.

3. Start of Return Stroke

Turn knife over so that the cutting edge faces toward the body. Place hilt of blade at tip of sharpening steel. You are now ready for the return stroke.

4. End of Return Stroke

Draw blade across and down the sharpening steel with even pressure. At the end of this stroke knife and sharpening steel should be tip to guard.

**QUEEN
KNIVES
stay sharp
longer!**

A dozen or so even strokes equal in number on both sides of the blade will make even a dull knife razor-sharp. By carefully feeling the cutting edge you will be able to judge just when the knife has been sharpened enough. Use the same above procedure when sharpening a knife on a stone.
